SEOJU ENGINEERING CO.

■ About us

SEOJU ENGINEERING established in 1992 has been one of the leading companies in South Korea dedicated to designing, engineering, building, manufacturing and installing elaborate food processing machinery as a complete line, unit and part thereof for various types of snack foods and noodles more than thirty years.

Having been in industrial food processing business field for long time, we have reinforced required manpower with greatly well-experienced managers, outstanding engineers and well-trained technicians with long working experience as well. As a result, we have seen our overseas sales to Japan, almost all the South East Asian Countries, China, and Russia rapidly growing along with our domestic sales enjoying good reputation from our customers.

As a professional food machinery manufacturer, we are focusing on making a great deal of continual investment in research and development for new cutting edge technologies and improvements in order to meet our customers' requirement, especially for less labored productivity, cost saving and quality final product. The entire staff of SEOJU ENGINEERING including R&D center are committed ourselves to provide latest technology of the food processing machinery for valuable customers.

Quality Food Processing Machinery Since 1992
